Types of Aircraft

CIRRUS MINOR

Embodying 12 years' experience in the design, construction and operation of Aero Engines, the Cirrus Minor is constructed from only the highest grades of material and each engine carries a 12 months' guarantee.

Simple, robust, and economical it is rapidly finding favour in many parts of the World, is being fitted in 10 Types of Aircraft and has been chosen for others in course of construction.

The Cirrus Minor has been supplied to Foreign Governments and is in use in Latvia, India, Belgium, South Africa, Germany, Denmark and Australia.
